

Interviewer: Describe a challenging problem you solved.

Candidate: I designed the RTL architecture for the controller and implemented the interfaces in SystemVerilog.

Interviewer: What measurable impact did you have?

Candidate: I reduced end-to-end latency by 40% after changing the buffering strategy.

Interviewer: Tell me about a failure.

Candidate: We had an outage caused by a memory leak. I identified the issue and led the fix, then added monitoring and alerts.
